

Agriculture Research Brisbane

QPC also specialises in conducting high quality Agricultural research, contract R+D field trials for determining efficacy and crop safety of various insecticides, herbicides and fungicides for new chemical registration or label extension.

These trials are typically conducted on farms, nurseries or on public land in close cooperation with the chemical manufacturing companies, local Councils or other NGO's. Operational areas include the Lockyer Valley, the Gold and Sunshine Coasts and the greater Brisbane metropolitan area.

Trials are conducted with the strictest confidentiality. Please provide a trial protocol when you contact Fortress Pest Control for a quote.
